PROJECT DOCUMENTATION - TCG-134-93

This letter provides documentation for the Environmental Protection Agency (EPA) Superfund Innovative Technology Evaluation (SITE) Demonstration Project conducted under the Sitewide Treatability Studies Program. Attached are the scope of work, project schedule and cost estimate for this project. The draft proposal to provide funding for the project under the "Work for Others" program (DOE Order 4300.2B, Non-Department of Energy Funded Work) was forwarded on May 19, 1993 to the Department of Energy, Rocky Flats Office. Included in the attachment are a logic flow diagram and a total project float sort which were used in the preparation of the cost estimate. A change control action has been scheduled on June 11 to reallocate funds from other treatability studies until further funding under the Work for Others program has been approved and received.

If you have any questions or require further information, please call M. C. Rupert of Environmental Engineering & Technology at X6956.
